CSHQA Designs New Glanbia Facilities in Eastern Idaho

Boise-based CSHQA, a design collaboration, a full-service architectural and engineering firm, has designed two new facilities in Twin Falls, ID for Glanbia, a major manufacturer of cheese and dairy products in the U.S. A ground-breaking ceremony for the first facility, a new, 40,060-SF, three-story corporate headquarters, was held July 16, 2012. The second facility, a new, 14,500-SF, single-story cheese innovation center, will house research and manufacturing operations. Both facilities should be completed by Spring 2013.

CSHQA worked with Uptown Developers and Glanbia to design facilities that not only represented the corporate image of Glanbia, but also related to the surrounding neighborhood. The massing and material selections for the buildings were influenced by the projects' location in the City of Twin Falls' Historic Warehouse District. CSHQA is working with building contractor Engineered Structures, Inc. (ESI) as part of a design/build team.

*****
